

Ms. Nason

I am writing to encourage you to use your power to double the CAFE standard for both passenger cars and light trucks/SUVs.

When faced with a similar oil crisis in the 1970's, we as a nation stepped up to the challenge by doubling our national mileage standard. It's time to do so again.

As Japan, China, Australia, the EU, and Canada have all surpassed us in mileage standards, failure to increase our own causes severe environmental, economic, and security problems.

Please double the standard.

Sincerely,

Susan Pottle
